

Street Tree Masterplan 2022

Review of the 2013 Masterplan

- The existing masterplan was adopted in 2013
- Since that time only minor modifications have been made
- The ongoing failure of the *Agonis flexuosa* (W.A. Peppermint Trees) and the Polyphagous Shot Hole borer outbreak around the Town of Claremont has led to an extensive review
- This review identified the existing Masterplan
 - had limited flexibility
 - small mixture of species
 - only lists a single species per street for all streets in the Town
- As a result of the above, residents contact the Town frequently to raise concerns
- Certain species have not thrived due to disease, suitability, climate and soil conditions
- Local fauna has fewer options for habitat.

Grandfather Trees

There are currently five species of Grandfather Tree that have been previously planted but due to repeated failures are no longer viable.

Currently there are five species on the Grandfather list (subject to future reviews)

- Western Australian Peppermint (*Agonis flexuosa*)
- Jarrah (*Eucalyptus marginata*)
- Liquidambar (*Liquidambar styraciflua*)
- Red Flowering Gum (*Corymbia ficifolia*)
- Coral Tree (*Erythrina sykesii*)

Tree Species Selection

Factors which have been used to determine the suitable species are:

- The existing streetscape
- Community feedback from Town wide survey (completed September 2022)
- Attractive appearance and canopy cover
- Suitability to Perth's climate as well as drought tolerance
- Disease and pest resistance
- Growth habit and rate
- Increased biodiversity and habitat for fauna
- Ongoing maintenance
- Availability from plant nurseries

Verge sizes have been defined as three types:

- 1. Restricted locations**
Narrow verges or median islands
- 2. Standard locations**
Average sized verges
- 3. Open locations**
Larger than usual sized verges

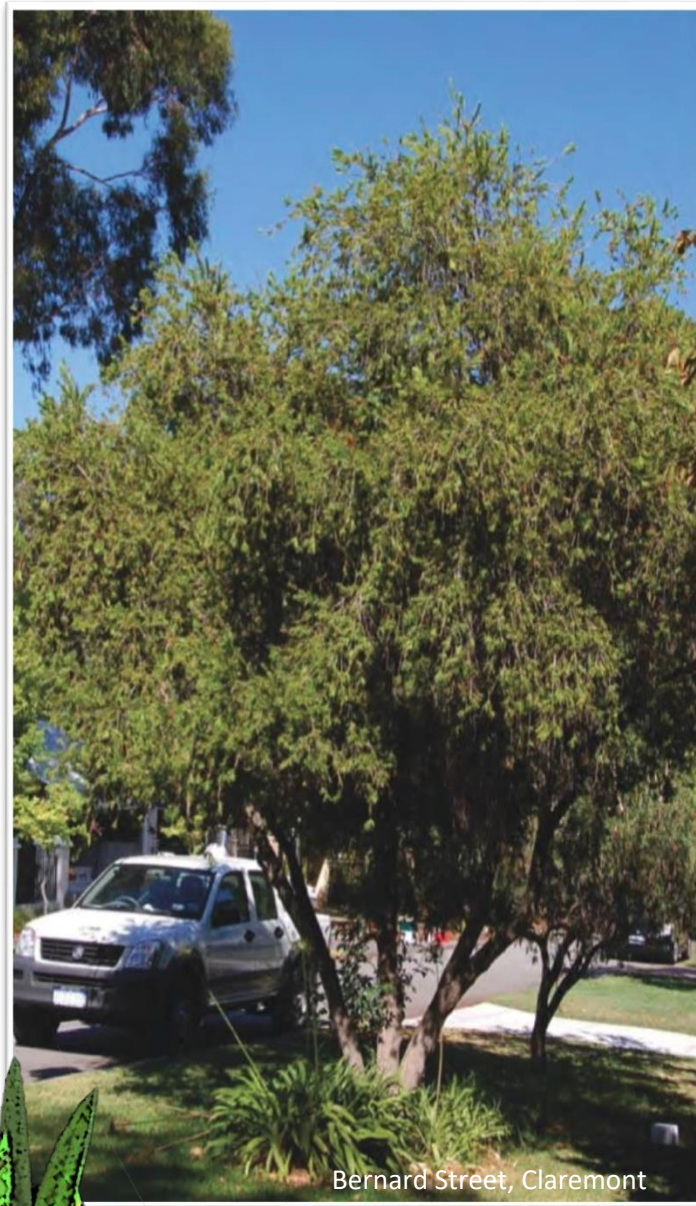

Restricted Location Tree Species

Narrow verges or median islands:

- Bottlebrush “Kings Park Special” (*Callistemon citrinus*)
- Chinese Tallow (*Triadica sebiferum*)
- Coral gum (*Eucalyptus torquata*)
- Hong Kong Orchid Tree (*Bauhinia blakeana*)
- Manchurian Pear (*Pyrus ussuriensis*)
- Spotted Gum (*Corymbia maculata*)
- Tuckeroo (*Cupaniopsis anacardioides*)
- Broad-leaved Paperbark (*Melaleuca viridiflora*)
- Water Gum (*Tristaniopsis laurina*)
- Coolibah (*Eucalyptus victrix*)
- Red Ironbark (*Eucalyptus sideroxylon rosea*)
- Cottonwood (*Hibiscus tiliaceus rubra*)
- Lacebark Tree (*Brachychiton discolor*)
- Kurrajong (*Brachychiton populneus*)

Bottlebrush

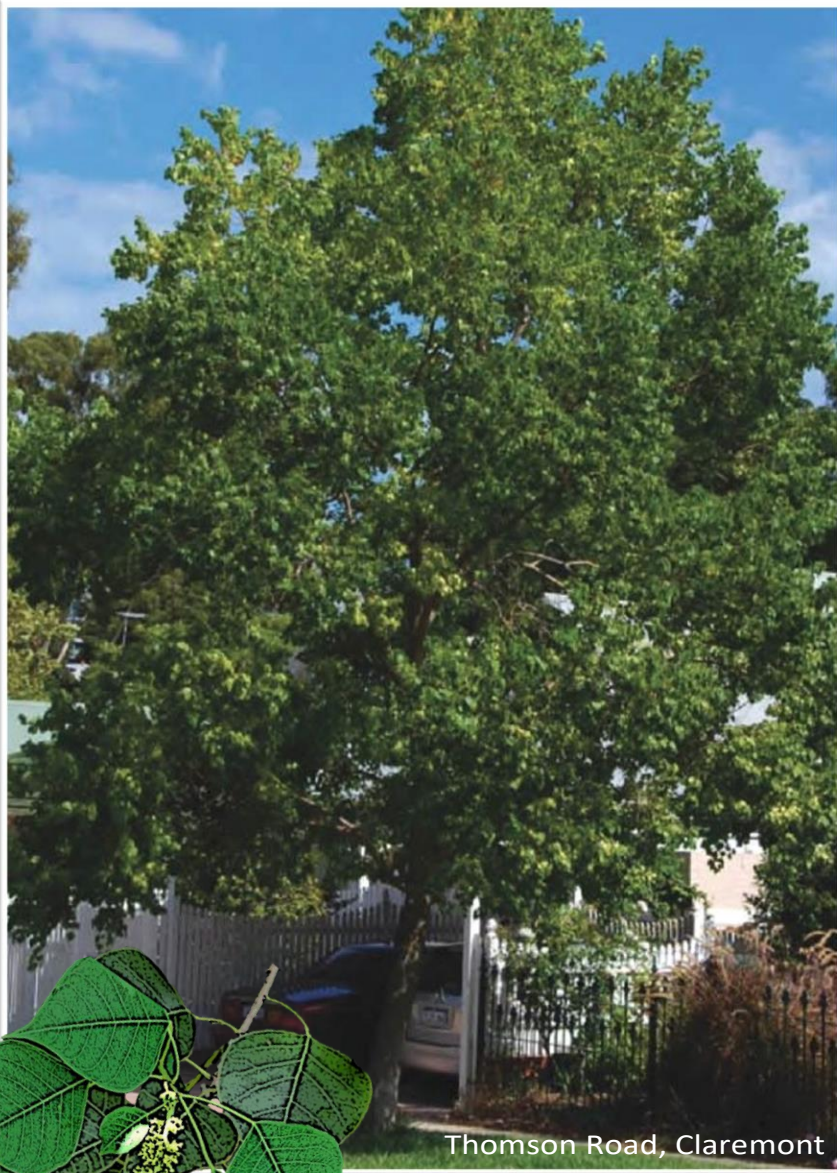

(*Callistemon citrinus* “Kings Park special”)

- Native to Australia
- Small evergreen tree to 8m
- Produces masses of red bottlebrush shaped flowers in spring and summer

Chinese Tallow

(*Triadica sebiferum*)

- Native to China and Japan
- Small to medium deciduous tree to 8m
- Leaves turn red in autumn

Coral Gum

(Eucalyptus torquata)

- Native to Goldfields, WA
- Small, hardy evergreen tree to 8m
- Coral pink, bird attracting flowers from August to December

Hong Kong Orchid Tree

(Bauhinia blakeana)

- Native to Hong Kong
- Small evergreen tree to 8m
- Fragrant pink-purple flowers in Spring

Manchurian Pear

(Pyrus ussuriensis)

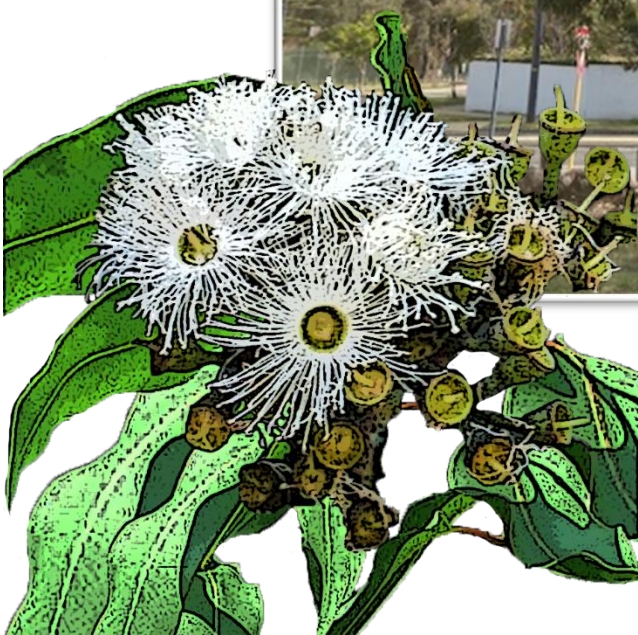

Victoria Avenue, Claremont

- Native to Northern Japan and Korea
- Small upright deciduous tree to 9m
- Red, yellow and orange foliage in autumn and white flowers in spring

Spotted Gum

(*Corymbia maculata*)

- Native to coastal Eastern Australia
- Tall evergreen tree up to 15m
- White flowers are displayed from late Winter until Spring

Tuckeroo

(Cupaniopsis anarcardiodes)

Swanway Crescent, Claremont

- Native to NSW & QLD
- Small evergreen tree to 8m
- Dark green, glossy leaves and yellow flowers in Summer and Autumn

Broad-leaved Paperbark

(Melaleuca viridiflora)

- Native to Eastern Australia
- Medium evergreen shade tree to 15m
- Bird attracting tree with soft, papery white bark and red flowers

Water Gum

(Tristanopsis laurina)

- Native to Eastern Australia
- Medium, evergreen shade tree to 15m
- Perfumed, yellow bird, attractive flowers in spring and summer

Coolibah

(Eucalyptus victrix)

- Native to Western Australia
- Small evergreen tree to 8m
- White bark with grey green foliage
- Small creamy white flowers throughout Summer

Stock image provided above

Red Ironbark

(Eucalyptus sideroxylon rosea)

Davies Road, Claremont

- Native to Eastern Australia
- Bird attracting, pink to red flowers during Winter and early Spring
- Deeply furrowed, dark brown to black bark

Lacebark

(Brachychiton discolor)

- Native to Eastern Australia
- Medium evergreen tree to 15m
- Cream and pink coloured flowers in Spring and Summer

Kurrajong

(Brachychiton populneus)

Stock Image provided

Stock image provided

- Native to Eastern Australia
- Medium semi deciduous tree to 20m
- Bright pink flowers in Summer

Standard Location Tree Species

Average Sized Verges:

- Chinese Pistachio (*Pistacia chinensis*)
- Claret Ash (*Fraxinus raywood*)
- English Oak (*Quercus robur*)
- Flooded Gum (*Eucalyptus rudis*)
- Jacaranda (*Jacaranda mimosifolia*)
- Narrow Leaf Black Peppermint (*Eucalyptus nicholii*)
- Broad-leaved Paperbark (*Melaleuca viridiflora*)
- Poinciana (*Delonix regia*)
- Red flowering yellow gum (*Eucalyptus leucoxydon rosea*)
- Red Ironbark (*Eucalyptus sideroxydon rosea*)
- Spotted Gum (*Corymbia maculata*)
- Swamp Sheoak (*Casuarina obesa*)
- Watergum (*Tristaniopsis laurina*)
- Tuckeroo (*Cupaniopsis anarcardioides*)
- Cottonwood (*Hibiscus tilaceus rubra*)
- Lacebark Tree (*Brachychiton discolor*)
- Kurrajong Tree (*Brachychiton populneus*)

Chinese Pistachio (*Pistacia chinensis*)

- Native to China and Taiwan
- Small to medium deciduous tree up to 20m
- Red, orange and yellow Autumn foliage

Stock image provided above

Claret Ash

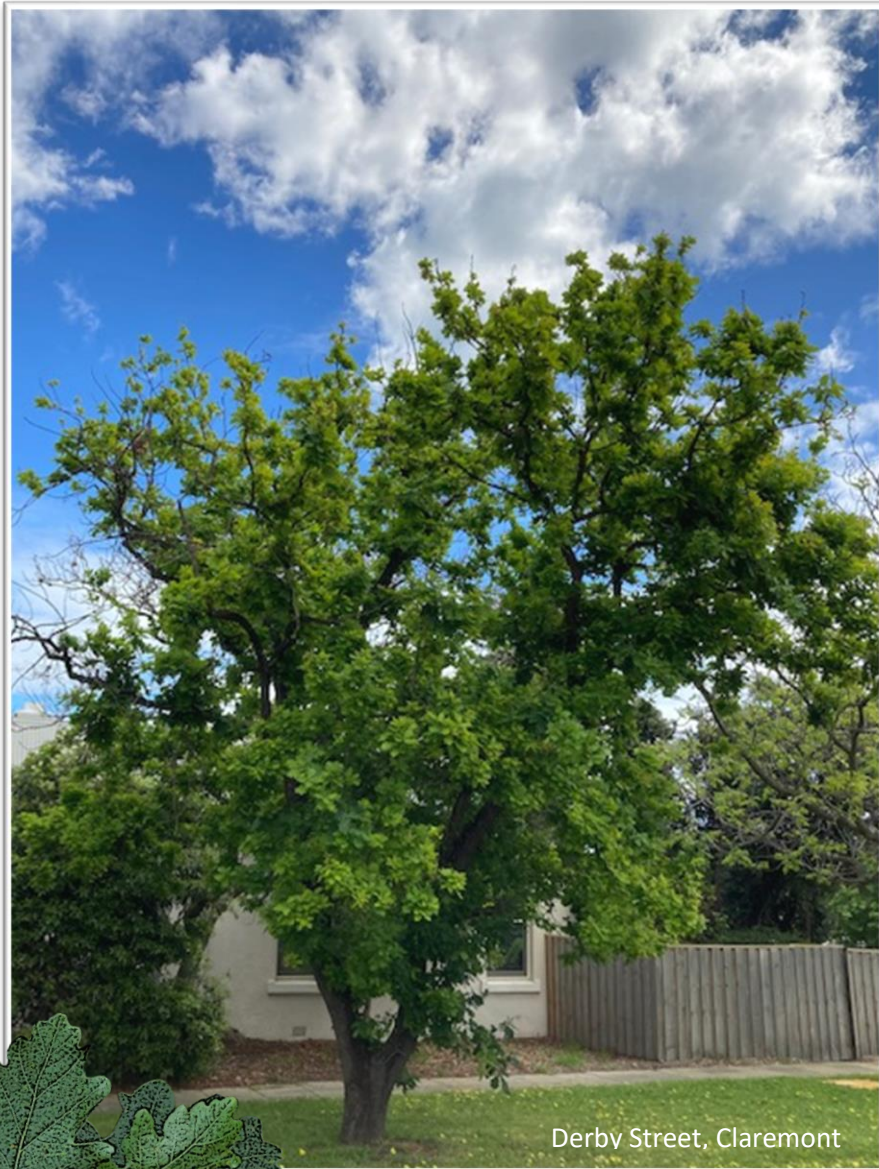

(Fraxinus angustifolia raywood)

- Native to South Australia
- Medium deciduous tree to 15m
- Narrow leaves turn a deep burgundy colour in Autumn

English Oak

(*Quercus robur*)

- Native to Europe and Western Asia
- Medium, wide growing deciduous shade tree to 12m
- Small yellow flowers in Spring and yellow Autumn foliage

Flooded Gum (*Eucalyptus rudis*)

- Native to Western Australia
- Large evergreen tree up to 20m
- Bird attracting, white flowers from Winter to Spring

Photo location: Strickland Street, Claremont

Jacaranda
(Jacaranda mimosifolia)

- Native to South America
 - Medium deciduous shade tree to 15m
 - Produces clusters of mauve flowers on bare wood in Spring
- Photo location: Pennell Road, Claremont*

Narrow-Leaved Black Peppermint (*Eucalyptus nicholii*)

- Native to the Northern tablelands of New South Wales
 - Evergreen tree up to 15m tall and dull blue to green hanging foliage with a domed canopy
- Stock image provided*

Broad-leaved Paperbark

(Melaleuca viridiflora)

- Native to eastern Australia
- Medium evergreen shade tree to 15m
- Bird attracting tree with soft, papery white bark, with red flowers

Stock image provided

Poinciana (*Delonix regia*)

- Native to Madagascar
- Medium deciduous shade tree to 10m with spreading canopy
- Produces masses of red flowers in spring

Photo location: Watkins Road, Dalkeith

**Red Flowering
Yellow Gum**
(Eucalyptus leucoxyton rosea)

- Native to Victoria, Australia
- Medium evergreen tree to 12m
- Red, bird attracting flowers from June to January

*Photo location: Stone Road,
Claremont*

Red Ironbark

(Eucalyptus sideroxylon rosea)

- Native to eastern Australia
- Bird attracting, pink to red flowers during winter and early spring
- Deeply furrowed, dark brown to black bark

Photo location: Davies Road, Claremont

Spotted Gum

(Corymbia maculata)

- Native to coastal Eastern Australia
- Tall evergreen tree up to 15m
- White flowers are displayed from late Winter until Spring

*Photo location: Judge Avenue,
Claremont*

Swamp Sheoak

(Casuarina obesa)

- Native to Western Australia
- Medium-large upright evergreen tree 10-15m
- Grey-green pine like needle leaves

*Photo location: John XXIII Avenue,
Nedlands*

Water Gum

(Tristaneopsis laurina)

- Native to Eastern Australia
- Medium evergreen shade tree to 15m
- Perfumed, yellow bird, attractive flowers in Spring and Summer

Photo location: Princess Road, Nedlands

Tuckeroo

(Cupaniopsis anarcardiodes)

- Native to New South Wales and Queensland
- Small evergreen tree to 8m
- Dark green, glossy leaves and yellow flowers in Summer and Autumn

Photo location: Swanway Crescent, Claremont

Cottonwood

(Hibiscus tilaceous rubra)

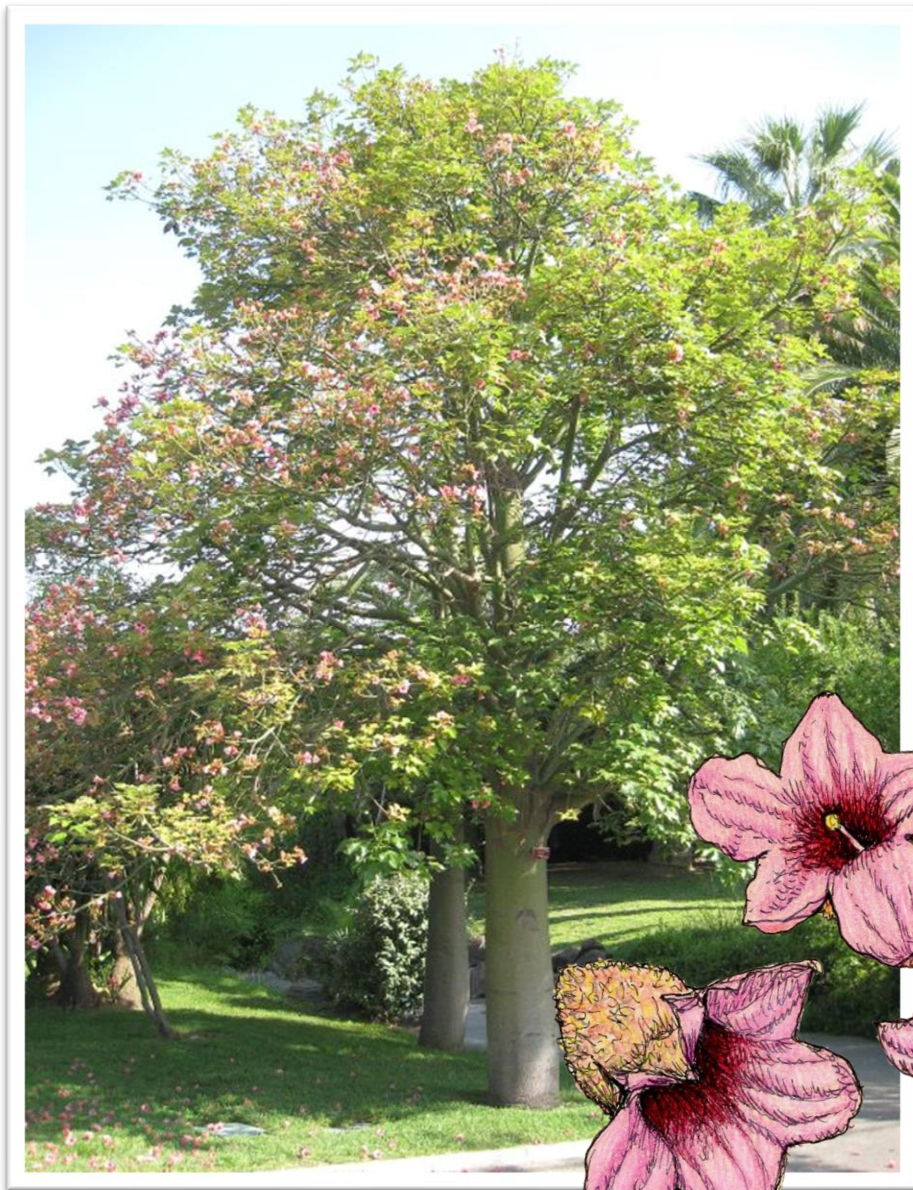

- Native to Eastern Australia and the Pacific Region
- Broad, evergreen tree to 8m
- Large, burgundy and dark green foliage and striking yellow flowers in Summer

Photo location: Dolphin Terrace, Mandurah

Lacebark

(Brachychiton discolor)

- Native to Eastern Australia
- Medium semi deciduous tree to 20m
- Bright pink flowers in Summer

Stock image provided

Kurrajong

(Brachychiton populneus)

- Native to Eastern Australia
 - Medium evergreen tree to 15m
 - Cream and pink coloured flowers in Spring and Summer
- Stock image provided*

Open Location Tree Species

Larger than usual sized verge:

- Coast Banksia (*Banksia integrifolia*)
- Illawarra Flame Tree (*Brachychiton acerfolius*)
- London Plane (*Platanus x acerifolia*)
- Marri (*Corymbia calophylla*)
- Tuart (*Eucalyptus gomphocephala*)
- English Oak (*Quercus robur*)

Coast Banksia

(Banksia integrifolia)

- Native to Eastern Australia
- Large evergreen tree to 25m
- Yellow bird attracting flowers from autumn to spring and pale green and silver foliage

Photo location: Graylands Road, Claremont

Coral Tree

(Erythrina sykesii)

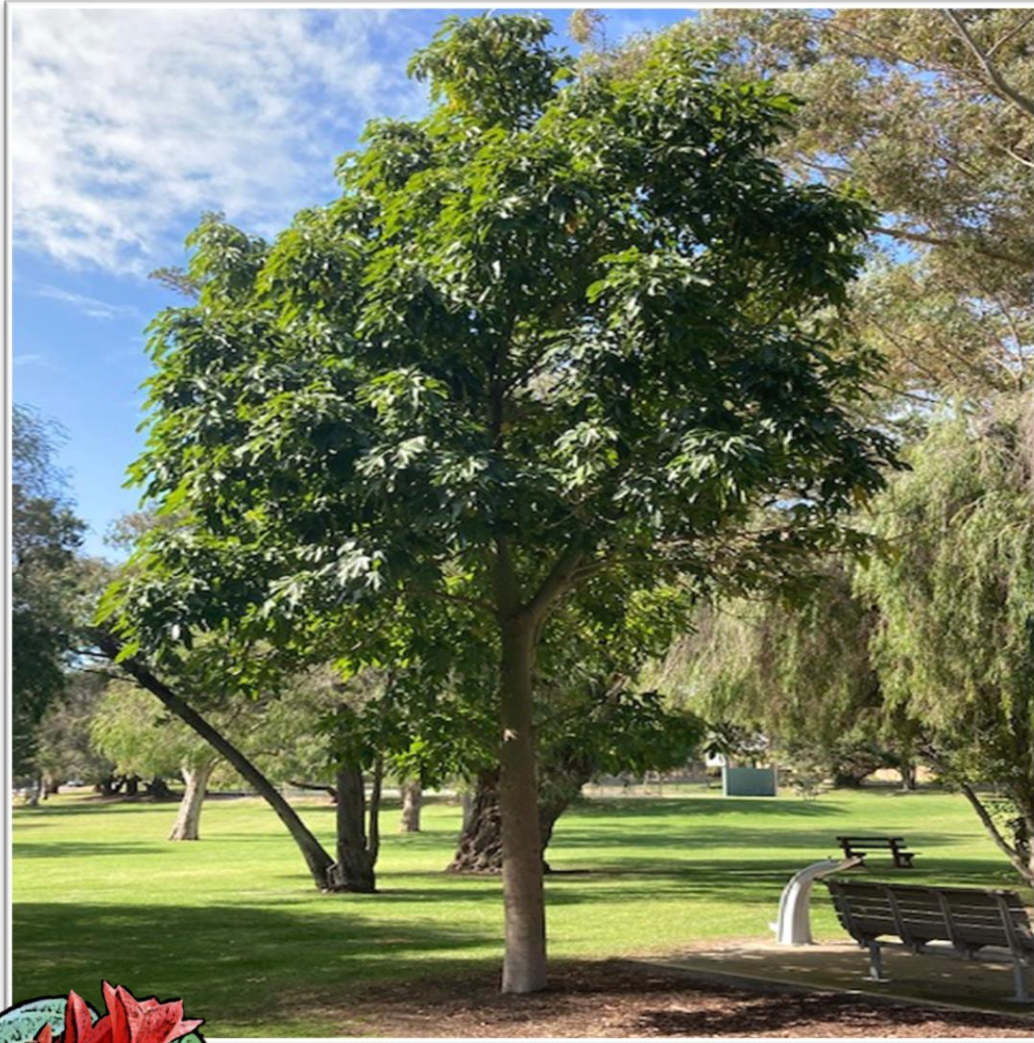

- This variety is of uncertain origin but Erythrinas occur naturally in many countries
- Large deciduous shade tree to 25m
- Produces red flowers on bare wood in Winter

Photo location: Loton Road, Claremont

Illawarra Flame Tree

(Brachychiton acerifolius)

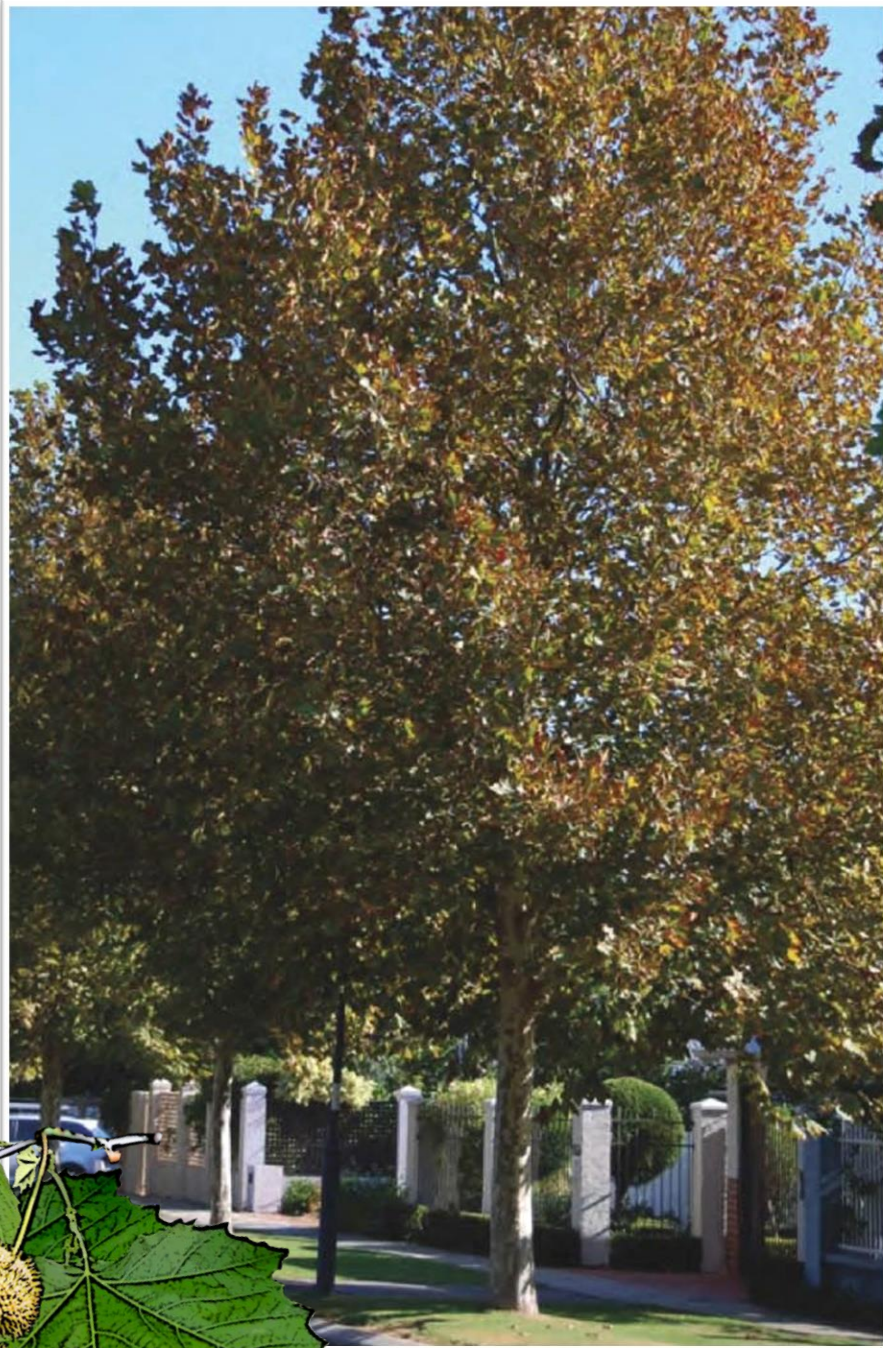

- Native to Eastern Australia
- Large semi deciduous tree to 30m
- Crimson flowers in spring and summer and small, glossy green leaves

*Photo location: Rowe Park,
Claremont*

London Plane

(Platanus x acerifolia)

- Native to Asia and USA (hybrid)
- The world's most widely used street tree
- Large deciduous shade tree to 30m

Photo location: Goldsworthy Rd, Claremont

Marri Tree

(*Corymbia calophylla*)

- Native to Western Australia
- Large evergreen tree to 40m
- Large clusters of creamy white, bird attracting flowers in summer

Photo location: Swanway Crescent, Claremont

Tuart

(Eucalyptus gomphocephala)

- Native to South Western Australia
- Large evergreen shade tree to 30m
- Bird attracting tree that does well in coastal situations

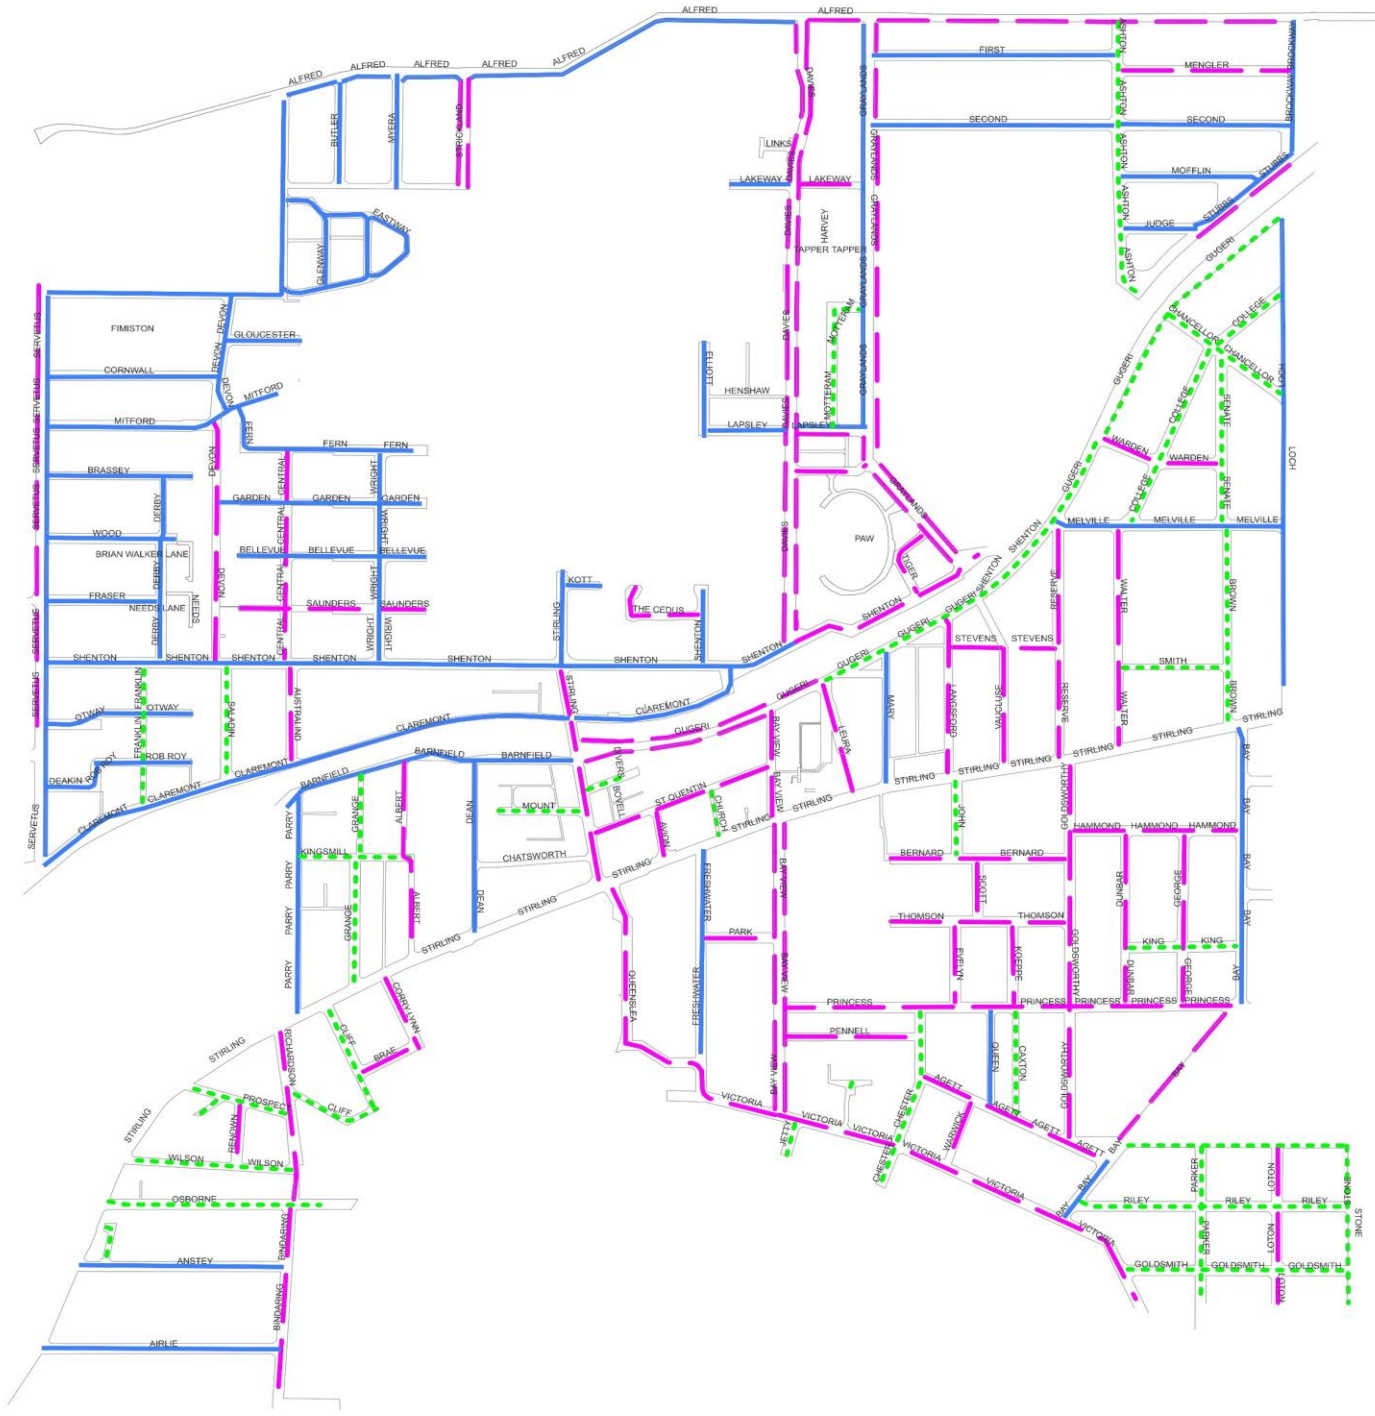

*Photo location: Cresswell Park,
Claremont*

Map of Street Classifications

Single Species Tree Avenue- Tree species remains the same as the 2013 Masterplan due to a strong existing theme and or species has grown successfully. All locations within the same street will receive the same tree species.

Grandfather Species Avenue -Tree species was a diseased tree and previously unsuccessful. Four species to be changed to a new more successful species are W.A. Peppermint, Red Flowering Gum, Liquidambar and Jarrah. All locations within the same street will receive the same new tree species.

Biodiverse Streets- Street contains a mixture of tree species, so any tree can be chosen from the recommended list based on verge size. All locations within the same street can receive a different tree species.

- Legend**
- - - Biodiverse Street
 - Grandfather Species - alternative option has been selected
 - Single Species - to be maintained
